(3) In response to the DECISION ON PETITION UNDER 37 C.F.R. §1.78(a)(3), mailed 25 July 2005, the continuing date for the above-identified has been amended to read as follows:

-- This application is a continuation of U.S. application serial no. 08/461,268, filed June 5, 1995, now abandoned, which is a continuation-in-part of PCT international application no. PCT/US94/02751, filed March 14, 1994, which is a continuation-in-part of U.S. application serial no. 08/089,985, filed on July 8, 1993, now abandoned, which is a continuation of U.S. application serial no. 08/032,383, filed March 18, 1993, now abandoned.

--

REMARKS

The First Petition under 37 C.F.R. §1.78(a)(3) was dismissed in view of:

- (i) the fact that application serial number 08/089,985 "cannot be a continuation of Application No. 08/461,268 since the application (08/461,268) was filed March 18, 1995," and;
- (ii) that "it is not clear why Application No. 08/450,462 is mentioned."¹

Applicant respectfully cure both defects by (i) amending the continuing data to read 08/032,383 as the application number for the March 18, 1993 filing; and (ii) removing reference to application serial number 08/450,462. *Both amendments are included in a concurrently filed Amendment, under 37 C.F.R. §1.114.* A courtesy copy of this Amendment is enclosed with this Renewed Petition.

Briefly, as noted *supra*, reference to application no. 08/461,268 (for a March 18, 1995 filing) instead of the correct reference to application no. 08/032,383 as the application number of the March 18, 1992 filing was merely an editorial oversight incorporated during the most recent amendment to the continuing data. Reference to the 08/032,383 application serial number can be found in the original continuing data for this application, as well as on the Filing Receipt.

¹ See page 2 of DECISION ON PETITION UNDER 37 C.F.R. §1.78(a)(3), mailed 25 July 2005

Applicants, as suggested by the Petitions Examiner, has removed reference to the national phase application filed from the cited PCT application (i.e., U.S. application serial no. 08/450,462). Applicants respectfully note that in the First Petition paper arguments were presented as to why inclusion of this application in the continuing data was not necessary. Thus, the Petitions Examiner and Applicant now seem to be in agreement that inclusion of that application data is not necessary to preserve continuity of the filings for this patent application family.

Applicants respectfully note that with the current amendment, the continuing data now listed coincides with the continuing data provided on the Filing Receipt. To this end, Applicants respectfully request that this Renewed Petition, in view of the concurrently filed Amendment under 37 C.F.R. §1.114, be GRANTED.

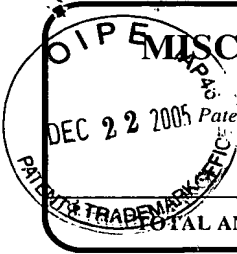

Respectfully submitted,

Date: 20 DECEMBER 2005
